

## Balaclava shield

---

Very comfortable radiofrequency shielding for the head and thyroid region.  
Medical grade, silver coated stretchy fabric provides very good microwave shielding.  
Washable and very soft.  
Can be worn many ways: covering nose/mouth or not. Covering neck or not. Size of eye opening can be adjusted to your preference. Shielding performance decreases over time.  
Lightweight, stretchy, anti-bacterial fabric is the key. One size fits all.

### Technical details

These shielded balaclaves form a conductive enclosure and effectively shield radiowaves and electric fields. Soft, light weight, and stretchable.

These shielded balaclaves offer the conductivity of silver with lycra-like stretch.

This medical grade silver plated 76% Nylon, 24% elastic fiber fabric offers the unique ability to stretch in all directions. Silver coating is 99.9% pure. Silver/gray color. Very unique!

- Shielding performance: 30-50 dB, tested from 1-10 GHz
- Temperature range: -30 to 90C
- Surface resistivity is 0.5 Ohm/sq.

*Our shielded balaclavas are made of a conductive stretch fabric making them suitable for any head*
